Tuesday - Friday 10-4  
Saturday - 10-5  
Sunday - 12-4  
Monday by Appt.

From left, Alan "Gordy" Techner, partner; Jodi Santimauro, showroom receptionist; and Mitchel Galinsky, product consultant; gather with a display of premium grilling products now available at the Awning Design and Fireside Pros showrooms in Windsor/Robbinsville.

## Come out and see what's cooking at Awning Design

They're at it again at Awning Design on Route 130 in Windsor. Partners Mark Pedersen and Alan "Gordy" Techner just can't resist coming up with more ways to help customers get the most out of their time at home.

First, it was Fireside Pros, the wood- and gas-burning stove and fireplace insert shop they opened last fall. Located right next door to the Windsor location of their full-service awning company, and offering the same friendly, knowledgeable and professional service Awning Design customers have come to expect, Fireside Pros got off to a great start. Whether they purchased an insert, stove or fireplace product, customers enhanced their homes with beauty and warmth – secure in the knowledge that Fireside Pros provided the highest quality products and best value.

This year, the partners are adding three brands of high-end gas and coal-fired grills to the products available at Awning Design. And just as they did with their awning and fireside product lines, they've done the kind of research the most discriminating customer would do. "We've explored the numerous products available and have selected top-quality brands that will enhance a homeowner's outdoor cooking experience for many years," said Techner. "Customers will

immediately see and feel the quality difference in these grills."

The Saffire Grill and Smoker is the newest, most innovative kamado style grill available today. Efficient and versatile, these grills use extremely hot temperatures for quick grilling and searing and hold low temperatures for hours for true, slow-smoked barbecue. Producing results unlike anything you've experienced before, kamado-style grills are catching on with people who want the best for their family and friends.

TEC infra-red grills are also among the new products Awning Design is proud to make available to customers. TEC's patented infrared grilling systems preserve the natural flavor and moisture of food, while imparting an authentic charbroil taste. Now you can experience in your own home the tender, juicy taste of 100% infrared grilling offered by many of the top restaurants in the world.

Known for high quality, durability and fantastic results, Napoleon Gourmet Grills are also on display at Awning Design. Napoleon's lineup includes many gas grills – from portable propane units to large grills you'll use for entertaining a crowd.

Customers are invited to visit the store where Mitchel Galinsky is looking forward to sharing his

expertise about the new grills which are only available at Awning Design's Windsor location. Be sure to ask about the outdoor fire pits, both wood-burning and propane-fueled, that are available, too.

Awning Design continues to be New Jersey's largest retailer of Durasol awnings, a line that has recently expanded to include Sun Structure products. Durasol's Sun Structure family is made up of unique products designed for both residential and commercial settings including three recently introduced awning innovations – Pinnacle, GENNIUS and Gallery.

Self-supporting and low maintenance, the SunStructure models are ideal for locations that require unusual shading and/or waterproof solutions. Techner, who is very excited about the addition of these products, knows that customers who have areas that are hard to shade will appreciate the new products. The store also carries Nulmage products and its own brand of customer awnings called SunBlok.

Awning Design's address is 1392 Route 130 South in Windsor/Robbinsville. Store hours are Tuesday-Saturday 10 a.m. to 5 p.m. and Sunday noon to 4 p.m. Mondays are by appointment.
